## REPORT

TO THE

## SECRETARY OF THE DEPARTMENT OF AGRICULTURE AND TECHNICAL INSTRUCTION FOR IRELAND.

SIR,

I have the honour to submit the detailed Annual Report on Agricultural Statistics for the year 1901.

I have brought together at the end of this Report a number of Summary Tables which bring out clearly the chief features of the Agricultural Statistics contained in the detailed Tables. It is hoped that the detailed Table of Contents will enable the large number of Tables in the volume to be consulted with ease.

With a view to bringing these returns into greater uniformity with the Agricultural Statistics of Great Britain, I have this year (in consultation with Major Craigie, Assistant Secretary to the Board of Agriculture of Great Britain), introduced certain changes into the detailed Tables. The following are the chief of these alterations:—In Tables 5 and 7 the areas under the following crops are shown separately, viz.:—Mangel wurzel, beet root, carrots, and parsnips. Again, in Tables 11 and 12 boars and sows "kept for breeding" are distinguished from other swine; and ewes "kept for breeding" are also, for the first time, separately distinguished from other classes of sheep. Still another change will be found in Tables 5 and 7 where the valuation of houses is now shown separately from the valuation of land, in place of being bulked with it as heretofore.

**Division of Land.**

The total area of Ireland—according to the figures supplied by the Director-General of the Ordnance Survey to the Census Commissioners in 1891—was 20,327,947 statute acres. The inclusion of 5,397 acres of reclaimed slob in the Co. Wexford brings the total area to 20,333,344 statute acres. This total—which is that taken in these returns since 1891—includes 129,681 acres under

water, but excludes close on half-a-million acres (492,252 is the exact number) under the larger rivers, lakes, and tideways. The following statement* shows the distribution of this area in 1900 and 1901 :—

| — | 1900. | 1901. | Increase or Decrease between 1900 and 1901. | |
|---|---|---|---|---|
| | | | Increase. | Decrease. |
| Under Crops, including "Clover, Sainfoin, and Grasses *for Hay*," ... ... | 3,100,397 | 3,069,789 | — | 30,608 |
| Under Grass, including temporary pasture, and Hay mown on permanent pasture, ... ... ... ... | 12,121,707 | 12,138,500 | 16,793 | — |
| Under Small Fruit and Fallow, ... | 12,589 | 10,886 | — | 1,703 |
| Under Woods and Plantations ... | 311,648 | 309,741 | — | 1,907 |
| Under Bog, Waste, Barren Mountain, Water, and Marsh, ... ... ... | 4,787,003 | 4,804,428 | 17,425 | — |
| Total, ... ... | 20,333,344 | 20,333,344 | — | — |

It will be noted that a departure has been made in this statement from the classification adopted in the Reports of this series for the years previous to 1900. "Hay mown on permanent pasture" and "temporary grasses" *when grazed* are put in the category of "Grass" (though technically, of course, as being under rotation, the latter is a "crop"). The idea is to divide off as far as possible arable land from pasture; to distinguish, in other words, land under the plough from land directly given over to stock-raising, or, as it may be called, pastoral land. The division as here given is not quite perfect for the reason just alluded to, that "temporary pastures" would strictly come under the term arable land, but in view of the fact that such lands are often not broken up in many parts of Ireland for three, five, or even ten years, during which time a large percentage of them are grazed, the object of the classification adopted is apparent.

Changes in the use to which the land of a country is put affect its whole social organization, and of no change can this be said with more truth than of the transfer of land from tillage to pasture. Hence it is important to adopt a classification which throws into bold relief the characteristic features of our rural economy. According to the estimates in the above statement it would appear that 30,608 acres of land went from under the plough in 1901 as compared with the preceding year, while 16,793 acres seem to have been added to the area under grass. These figures imply that 13,815 statute acres of land went out of cultivation in the year 1901.† It is, however,

* This Statement is not, for reasons explained in the text, comparable with the Table given on page 9 of the "Agricultural Statistics of Ireland for the year 1899," or with similar Tables in Reports previous to that year.

† In my Report (p. vii) for the year 1900 [Cd. 557—1901] I had to note that an apparent *addition* of 19,547 acres was made to the cultivated land of the country. This record of alternating loss and gain of comparatively small areas seems to me to bear out the interpretation put on such changes in the text.

possible that the recorded increase of 17,425 acres in "Bog, Waste, Barren Mountain," is, in part, due to a not unnatural divergence of opinion amongst the Enumerators in the different years as to what kind of land exactly should be described as "Barren Mountain." A tract of mountain-side which carried a few score sheep in one year may not happen to be grazed at the time of enumeration in a succeeding season, with the result that it is entered on the statistical forms in a different column on each occasion. Such indeterminate grazing areas are, doubtless, a source of error in comparative classification; but every effort is made by carefully-worded instructions, by queries to the Enumerators for purposes of verification, and in other ways, to minimise the possibilities of serious error. Moreover, errors of classification of the kind referred to would probably tend to correct each other when a long series of years is taken into consideration.

Adverting to the continuing contraction of the arable land of the country—this is, of course, the outstanding feature of these returns, especially when the process is regarded, not from year to year, but as an historical tendency. Land is being laid down to grass in Ireland, as in England, partly no doubt from the fact that stock raising and dairying are, at present prices, more profitable than corn growing, but far more largely (though this is not altogether a distinct cause from that just mentioned) because labour is scarce and dear. There are fewer agricultural labourers in the country, and those who are left are said to be not the most efficient. Pasture involves much less outlay than any form of cultivation, the great saving being of course in the labour bill. On the other hand, a certain proportion of the land going into grass in Ireland is land essentially unsuitable for pasture, while a net decrease of 29,615 acres in the area under cereals in a single year, coinciding with the decrease of 18,758 acres in the area under potatoes, 8,100 acres in the area under turnips, and 1,606 acres in the area under other green crops, represents a shrinkage which can hardly be explained, in its entirety, by reference to market conditions.

**Crop Areas.**

When we come to look into the details of the decline in the area of the cropped lands of Ireland, we find, as was to have been expected, that it is the cereals which have decreased most seriously. From the strictly economic point of view, the yearly increasing scarcity of agricultural labour; the fact that the prices of corn crops have fallen since 1870 to a much greater extent than the prices of meat-stuffs or dairy produce; and the splendid natural richness of the pastures of Ireland, point to an explanation of the decay of grain farming in this country. Since 1855 our wheat area has shrunk from 445,775 acres to 42,934 acres in 1901; our oat crop (though still pre-eminently Ireland's great cereal) has decreased by nearly 50 per cent.; while our barley (an industrial crop for which there is always a ready market at home) has declined from 226,629 acres in 1855 to 161,534 acres in 1901. That the decline of the root crops (including potatoes)

has, though serious, not been so marked will appear from this statement:—

Acreage under Cereals, Roots, and Meadow in 1855 and 1901.

| Meadow, .. | 1,314,807 | 2,178,592 | 65·7 | — |

The details of the changes for the separate crops are clearly brought out in the subjoined Table:—

Pnnted image digitised by the University of Southampton Library Digitisation Unit

The most noticeable features in these Tables are the decreases in the areas under the cereal crops—barley, wheat, and oats (the last-named has fallen continuously from 1,254,837 acres in 1894 to 1,099,335 acres in 1901); and the quite remarkable shrinkage in the area under potatoes. The present year is the thirteenth in succession in which the acreage under potatoes has decreased. In 1888 it stood at 804,566; in 1901 it is 635,321—a decline of 169,245 acres in thirteen years.

The continuing and serious decline in the area under turnips is also worthy of attention, as is the increasing popularity amongst Irish farmers of mangel wurzel. Turnips and swedes have apparently been found a precarious and, therefore, an expensive crop both in Ireland and Great Britain, if we may judge from the shrinkage in the areas under this class of roots. Mangel wurzel is less liable to disease, and more and more attention is being devoted to its cultivation in this country. As will be seen the loss in the area under turnips was practically identical with the gain in the area under mangel wurzel.

Our industrial fibre crop, flax, shows, in 1901 as compared with 1900, an increase of 7,991 acres, or 16·8 per cent., following an increase of 12,462 acres, or 35·6 per cent., in 1900 as compared with 1899. As usual, the cultivation of flax was almost entirely confined to Ulster, the area covered by the crop being 54,898 acres; in Leinster the extent was only 191 acres; in Munster, 49 acres; and in Connaught, 304 acres, to which amount the County Mayo contributed 273 acres. In regard to our chief cereals, the cultivation of both barley and wheat—though more evenly distributed than flax—is still considerably localized; while the culture of oats, on the other hand, is like that of potatoes, spread over almost every district of the country.

## Barley.

The culture of barley on anything like a large scale is confined to eight counties. The province of Leinster had under barley 72 per cent. of the total area under that crop in 1901 while Munster had 23 per cent. Ulster and Connaught had, respectively, 3 and 2 per cent. of the total barley area. I append a list of the counties in which an area of 1,000 acres or upwards was under barley last year:—Wexford, 31,000; Kilkenny, 19,000; Queen's County, 18,000; Cork and Tipperary, 17,000 each; King's County and Louth, 14,000 each; Kildare, 10,000; Carlow, 5,000; Galway, 2,000; Down and Kerry, 1,700 each; Waterford, 1,500; and Dublin, 1,200.

Printed image digitised by the University of Southampton Library Digitisation Unit

The following statement affords an estimate of the total production of barley in Ireland :—

| Year. | Statute Acres. | Yield (Cwts.) | Yield per Statute Acre. (Cwts.) |
|---|---|---|---|
| Average, 1888-97, ... .. | 174,000 | 2,935,000 | 16·9 |
| " 1898, ... ... | 158,000 | 2,980 000 | 18·9 |
| " 1899, ... ... | 169,000 | 3,040,000 | 17·9 |
| " 1900, ... ... | 174,000 | 2,779,000 | 16·0 |
| " 1901, ... ... | 162,000 | 2,915,000 | 18·0 |

The area under barley last year was 12,462 acres less than that for 1900, the highest since 1892 when the area under that crop was over 175,000 acres.

## Wheat.

While Ireland produces between one-third and one-fourth of the oats grown in the United Kingdom, her proportion of barley is less than one-tenth, and of wheat only about a thirty-seventh part. Down, Cork, Wexford, Galway, Dublin, Limerick, Tipperary, and Kilkenny are, in the order given, the greatest wheat-growing districts. Taking provinces as the unit, we find that, out of a total area under wheat in 1901 of 42,934 acres, Munster contributed 13,312 acres; Ulster, 12,498 (Down alone having 6,344 acres, or 51 per cent. of the total for the Province); Leinster, 11,885 acres; and Connaught, 5,239 acres.

## Potatoes.

The importance of the potato crop in Ireland is not so paramount as it was three or four decades ago, largely, of course, owing to the great emigration from the class who were the chief consumers of potatoes, but also, to some degree, to the introduction of a more varied dietary among the people. The potato still, however, forms the staple food of a large proportion of the poorer population of the South and West and North-west. As already stated, the acreage under potatoes in Ireland in 1901 was 635,321, as compared with 654,079 in the year 1900, showing a decrease of 18,758 acres. It is noticeable that there was in 1901 an increase of 15,889 acres in the area under potatoes in Great Britain. Of the acreage under potatoes in 1900, 66·4 per cent. consisted of "Champions," leaving only 33·6 per cent. for all other varieties. From the year 1891, however, the proportion under "Champions" showed a gradual decline from 79·7 per cent. in that year to 66·1 per cent. in 1900, but in 1901 the proportion shows a slight recovery to 66·4 per cent. Owing to

the dryness of the season the yield per acre (5·3 tons) of the potato crop in 1901 was the highest in the twenty years 1882-1901, following immediately on one of the lowest during the same period. The very considerable yearly fluctuations in the produce per acre of this staple crop is shown in the following tabular statement, with which the accompanying diagram may be compared :—

| Years. | Tons. | Years. | Tons. | Years. | Tons. |

As a general basis for calculating the average annual value of Irish crops, the following table, prepared by Sir Robert Giffen for the Financial Relations Commission, affords a careful estimate :—

In regard to the yield of the chief crops in 1901, the Irish farmers had not merely a more favourable season than those of Great Britain, but secured a general harvest considerably in excess of the average yield for the decade 1891–1900. The following tabular statement brings out this clearly:—

| YEARS. | Estimated Average Produce Per Statute Acre. | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| | Wheat. | Oats. | Barley. | Bere. | ye. | Potatoes. | Turnips. | Mangel Wurzel and Beet Root. | Cabbage. | Flax. | Hay. |

Comparing the produce of the cereal crops in 1901 with the produce in 1900, we find a decrease in wheat of 113,656 cwts., or 12·6 per cent.; in bere, of 337 cwts., or 13·5 per cent.; in pease of 513 cwts., or 8·6 per cent.; with an increase in oats of 271,377 cwts. or 1·5 per cent.; in barley, of 136,131 cwts., or 4·9 per cent.; in rye, of 3,809 cwts., or 2·6 per cent.; in beans, of 3,169 cwts, or 7·3 per cent. In green crops, potatoes show an increase of 1,530,382 tons, or 83·1 per cent.; turnips, an increase of 457,874 tons, or 10·3 per cent.; mangel wurzel and beet-root, an inerease of 265,198 tons, or 22·3 per cent.; and cabbage, an increase of 19,677 tons, or 4·4 per cent. Flax shows an increase of 495,148 stones of 14 lbs., or 30·4 per cent. (following an increase of 483,620 stones, or 42·2 per cent., in 1900; an increase of 69,404 stones, or 6·5 per cent., in 1899; a decrease of 87,707 stones, or 7·5 per cent., in 1898 as compared with 1897; a decrease of 483,213 stones, or 29·3 per cent., in 1897 as compared with 1896; a decrease of 304,173 stones, or 15·6 per cent., in 1896 as compared with 1895; a decrease of 1,490,281 stones, or 43·3 per cent., in 1895 as compared with 1894; and an increase of 980,112 stones, or 39·8 per cent., in 1894 as compared with 1893); hay from clover, sainfoin, and grasses under rotation, a decrease of 59,549 tons, or 4·4 per cent.; and hay from permanent pasture or grass not broken up in rotation, a decrease of 414,677 tons, or 10·8 per cent.; the entire hay crop showing a decrease of 474,226 tons, or 9·1 per cent.

The yield per acre of cereal crops in 1901, compared with that of 1900, shows an increase in wheat from 16·7 cwts. to 18·3 cwts.; in oats, from 15·8 cwts. to 16·2 cwts.; in barley, from 16·0 cwts. to 18·0 cwts.; in bere, from 14·1 cwts. to 14·4 cwts.; in rye, from 12·8 cwts. to 13·7 cwts.; in beans, from 19·0 cwts. to 20·8 cwts.; in pease from 13·5 cwts. to 14·8 cwts. In other crops—potatoes show an increase from 2·8 tons to 5·3 tons; turnips, an increase from 14·9 tons to 16·9 tons; mangel wurzel and beet-root, from

17·2 tons to 18·8 tons; and cabbage, from 10·4 tons to 10·7 tons. Hay from clover, sainfoin, and grasses under rotation shows a decrease from 2·2 tons to 2·1 tons; and the yield of hay from permanent pasture or grass not broken up in rotation, a decrease from 2·5 tons to 2·2 tons. The yield per acre of flax was 38·3 stones, against 34·3 stones in 1900, 32·7 stones in 1899, 31·2 stones in 1898, 25·6 stones in 1897, 22·8 stones in 1896, and 20·5 stones in 1895, when the yield was lower than in any year since 1871, with the exception of 1877.

These estimates redound to the credit of our Irish farmers, as well as emphasize the natural richness of certain districts of Ireland for grain raising, and also the differences of soil and climatic conditions between this country and Great Britain. In considering their significance, however, regard must be had to the comparatively small areas under wheat and barley. It will be noticed that Scotch farmers, with a still smaller area under wheat, succeed in raising on an average fully 5 bushels per acre more than is raised in Ireland; while in the case of barley, of which cereal 73,000 more acres were grown last year in Scotland than in Ireland, the estimated yield per acre for this country was but 4 bushels more than that recorded for Scotland. It is probable, again, that there is no soil in the United Kingdom more suitable for growing good barley crops than certain districts of the County Wexford, the Cloyne district of County Cork, and portions of Lower Ormond, in North Tipperary.

In regard to green crops, while Ireland more than holds her own in the case of turnip production per acre, the estimate of the yield of the potato crop in this country is remarkably lower than that of England. It must be remembered, however, that the area under potatoes in Ireland is on an average between three and four hundred thousand acres more than the same area in England.

**Number of Holdings and Number of Occupiers.**

According to the returns for 1901, the number of separate holdings was 590,175, being 3,458 more than in the previous year. The holdings which decreased in number were those "above 5 and not exceeding 15 acres" by 333; those "above 50 and not exceeding 100 acres" by 169; those "above 200 and not exceeding 500 acres" by 33; and those "above 500 acres" by 11.

The holdings which increased in number were those "not exceeding 1 acre" by 2,480; those "above 1 acre and not exceeding 5 acres" by 701; those "above 15 and not exceeding 30 acres" by 561; those "above 30 and not exceeding 50 acres" by 206; and those "above 100 and not exceeding 200 acres" by 56.

As in many instances landholders occupy more than one farm, and as in other cases farms extend into two or more townlands—the portion in each townland being enumerated and classified as a separate holding—it has been considered desirable, with the view of ascertaining the number of Occupiers, and of classifying them according to the total extent of land held by each, to obtain a return of the number of persons having more than one farm or holding. Each enumerator is, therefore, required to furnish the name of every landholder residing in his district who has two or more farms, or whose farm extends into two or more townlands, together with the area of each portion and the locality in which it is situated. From the number of actual occupiers thus arrived at, it appears that in 1901 there were 590,175 holdings in the hands of 543,238 occupiers.

The number of separate holdings and the number of occupiers in each province in 1900 and 1901, respectively, were:—

The total number of occupiers of land returned in 1901 was 543,238, being 1,321 less than in the previous year. Excluding those holding land "not exceeding one acre," who are to a great extent merely occupiers of small gardens, the landholders numbered 470,004 in 1901, or 3,452 less than in 1900, the number in Leinster having decreased by 505—from 92,039 in 1900 to 91,534 in 1901; in Ulster by 2,198—from 170,743 in 1900 to 168,545 in 1901; and in Connaught by 830—from 109,646 in 1900 to 108,816 in 1901; but increased in Munster by 81—from 101,028 in 1900 to 101,109 in 1901. There was a decrease of 3,750 in occupiers holding land above 1 and not exceeding 50 acres, and the number holding land exceeding the latter acreage increased by 298.

The following statement shows the number of occupiers of land in each year from 1895 to 1901 by provinces:—

| Provinces. | Number of Occupiers in the Year. | | | | | | |
|---|---|---|---|---|---|---|---|
| | 1895. | 1896. | 1897. | 1898. | 1899. | 1900. | 1901. |

The number of holdings "above 1 and not exceeding 5 acres" diminished enormously between 1841 and 1901. In Leinster the decrease was 64·6 per cent.; in Munster 78·8; in Ulster 80·2; in Connaught 87·5; and in all Ireland 79·8 per cent. In the same period holdings "above 5 and not exceeding 15 acres" diminished; the decrease in all Ireland was 39·0 per cent. In Leinster the decrease was 45·0 per cent.; in Munster 68·3; and in Ulster 36·6; while in Connaught, on the other hand, these holdings increased 2·1 per cent. Holdings "above 15 and not exceeding 30 acres" increased 6·0 per cent. in Leinster; 113·3 per cent. in Ulster; and 486·0 per cent. in Connaught; they decreased 12·2 per cent. in Munster. In all Ireland they increased 69·0 per cent. Holdings "above 30 acres" increased 119·4 per cent. in Leinster; 245·3 in Munster; 361·5 in Ulster; 427·7 in Connaught; and 238·3 per cent. in all Ireland. The total number of holdings "above 1 acre" decreased between 1841 and 1901 by 22·5 per cent. in Leinster; 30·7 per cent. in Munster; 23·2 in Ulster; and 25·5 in Connaught, and 25·4 in all Ireland.

**Live Stock.**

An examination of the tables devoted to Live Stock will show that 64,773 cattle were added to our Irish herds in 1901. In the returns for Great Britain, on the other hand, we find a registered decline of 41,276 in the cattle population of that

country. The figure for the Irish herds—4,673,323—is the highest total ever recorded for Irish cattle since these agricultural statistics have been first collected. The increase, it will be seen, has been progressive since 1895. Pigs have, on the other hand, declined very considerably, the total for last year, 1,219,315, being the smallest since 1893. At the period of the enumeration in 1901, the total number of horses in Ireland was 564,916, being a decrease of 2,062 compared with the number for 1900. There was a decrease of 17,271 in the number "two years old and upwards," but an increase of 9,243 in the "one year old and under two," and of 5,966 in those "under one year." The number of Mules was 28,882, or 1,796 less than in 1900, and the number of Asses 238,980, being a decrease of 3,267. Horses, Mules and Asses taken together numbered 839,903 in 1900, and 832,778 in 1901, being a decrease of 7,125, or 0·8 per cent., in the latter year; compared with the average number for the ten years 1891–1900, they show a decrease of 28,541, or 3·3 per cent.

The number of Sheep in 1901 was 4,378,750, being 8,126 less than the number for the previous year, but 51,947, or 1·2 per cent., more than the average for the ten years 1891-1900; the "one year old and upwards" increased 405, as compared with the number in 1900, while those "under one year" decreased by 8,531, or 0·5 per cent. Pigs were returned as 1,219,135 in 1901, showing a decrease of 49,386, or 3·9 per cent., as compared with the previous year. The "one year old and upwards" increased by 31,145, or 23·0 per cent., while those "under one year" decreased by 80,531, or 7·1 per cent. Comparing the number of pigs returned in 1901 with the average for the ten years 1891–1900, we find a decrease of 78,782, or 6·2 per cent. The number of goats in 1901 was 312,409, being 6,331 more than in 1900, and 343, or 0·1 per cent., under the average for the ten years 1891-1900. Poultry numbered 18,810,717 in 1901, being 263,410 more than in 1900, and 1,906,463, or 11·3 per cent. over the average for the ten years 1891-1900. Of the 18,810,717 poultry in 1901, 1,124,975 were turkeys; 1,962,359 geese; 3,040,880 ducks; and 12,682,503 ordinary fowl. Compared with 1900, turkeys increased by 16,333, geese decreased by 45,360, ducks increased by 13,770, and ordinary fowl increased by 278,667.

The summary table S. (page 18) shows the number of Milch Cows in Ireland in each year from 1854—the first year in which Milch Cows were separately enumerated—to 1901. The average number for the first five years of the period was 1,579,851, and for the last five years 1,450,106, being a decline of 129,745, or 8·2 per cent. The highest number in any one year was 1,690,389 in 1859, and the lowest 1,348,886 in 1864. The number for last year was 1,482,483, being 42,915 over the average for the preceding five years, and 24,409 over the number for 1900. The number of Milch Cows enumerated for 1901 was higher than that for any year since 1879.

Ireland is furnished when we take into account the export trade, the extent of which is shown in the subjoined statement :—

The feature of the above Table is the growth in the export trade between 1855 and 1875 is remarkable, as is also the expansion in the export trade of sheep and pigs in recent years. Another aspect of the extent of the trade is presented in the table that follows:—

**Forestry.**

Only about 1½ per cent. of the total area of Ireland is under woods, while there is over 23 per cent. of uncultivated land in the country. The woods in England are 5·1 per cent., in Scotland 4·5, and in Wales 3·8 per cent. of the totalareas. Dr.

Pnnted image digitised by the University of Southampton Library Digitisation Unit

Schlich, in his Report on the Afforestation of Ireland, 1885, estimates that about 2,000,000 acres of the total waste land of this country could be made available for plantations. Professor Fisher, of the Royal Indian Engineering College, endorses this view, and adds:—"Tenants and graziers who would oppose the planting of 2,000,000 acres of the waste lands of Ireland, must be extremely short-sighted people; the greatest of all wants in Ireland is an investment of capital of this kind, an investment which will yield an enormous return in affording labour to the people, and in supplying raw material for industries which cannot prosper without it, as well as timber for export, and for the improvement of farms and dwellings."* There is annually imported into the United Kingdom from Sweden, Norway, Russia, and other countries timber valued at over nine millions sterling, of a kind that could be grown in these islands, that is eliminating such exotic woods as teak, mahogany, and the hard woods of Australia. In view of these considerations, it is unsatisfactory to find that there has been a net decline of 30,117 acres since 1880.

Inquiries relative to woods and plantations, showing the extent in acres of each class of timber, were made in connection with the Census of 1841. The following is a summary of the acreage under each kind of tree (exclusive of detached trees) in that year, distinguishing the periods in which the trees were planted:—

| Period in which Planted. | Oak. | Ash. | Elm. | Beech. | Fir. | Mixed. | Total. |
|---|---|---|---|---|---|---|---|
| | Acres. | Acres. | Acres. | Acres. | Acres. | Acres. | Acres. |

| 1791–1800, ... | 1,493 | 927 | 135 | 384 | 1,243 | 22,399 | 26,581 |
| 1801–1810, ... | 1,327 | 689 | 134 | 342 | 2,691 | 31,087 | 36,270 |
| 1811–1820, ... | 1,393 | 679 | 131 | 270 | 5,496 | 42,878 | 50,856 |
| 1821–1830, ... | 1,342 | 442 | 140 | 730 | 7,684 | 51,456 | 61,794 |
| 1831–1840, ... | 1,197 | 628 | 380 | 600 | 6,513 | 55,689 | 65,007 |
| TOTAL, ... | 29,536 | 6,042 | 1,417 | 3,274 | 25,239 | 280,096 | 345,604 |

Since 1851 (with the exception of the year 1852) the acreage under woods and plantations has been ascertained annually in connection with the Agricultural Statistics; but until the year 1891 the total extent was the only information sought for, no particulars as to the kind of trees having been obtained. In that year returns giving the latter information were collected and the results were published in a table showing by counties the distribution of the various descriptions of trees.

The following table shows the acreage under woods and plantations in the year 1851, and in each year from 1853 to 1901, inclusive:—

| 1867 | 323,420 | 1884 | 332,006 | 1901 | 309,741 |

The above statement shows that, during the period 1851–1901, the number of acres under woods and plantations varied from 304,906 in 1851 to 339,858 in 1880, and that, comparing 1901 with 1851, there has been an increase of 1·6 per cent., the extent in 1851 being 304,906 statute acres, and in 1901, 309,741 acres.

The inquiries into forestry operations instituted in 1890, and continued in the ten following years, were repeated in 1901. During the year ended 30th June, 1901, 1,740 acres were planted with trees, 1,111 acres more than the extent planted in the preceding year. In connection with this subject, it may be here mentioned that from the passing of the Act 29 and 30 Vic., cap. 40, to the 31st March, 1901, 137 loans, for £32,005, were sanctioned for planting for shelter, and of this number four loans for £955 were sanctioned in the last year of that period. The number of trees felled, both for clearance and for thinning plantations, amounted to 941,132. The area returned as cleared is 1,212 acres.* Of the trees felled, 462,481 were used for "propping," which appears to have been the chief purpose to which the timber of almost all descriptions was applied. The numbers applied to the principal specified uses comprise also:—13,722 trees for sleepers, 24,712 for paling, 27,101 for fuel, 14,893 for furniture and building purposes, 4,981 for carts, wagons, &c., 8,550 for telegraph and telephone poles, and 3,615 for clog soles.

*It will be noticed that while, according to the Table given above, there would appear to have been a decrease of 1,907 acres under woods and plantations, from these forestry statistics there would, on the contrary, appear to have been an increase of 528 acres under woods. This is a somewhat serious discrepancy, but there are very considerable difficulties in ascertaining the area under woods and plantations from a very large number of persons, many of whom are imperfectly acquainted with the acreage under timber on their holdings.

In addition to the information regarding the total area under woods and plantations, returns were obtained in 1901 showing the proportion of the area entered under this heading occupied by each of the various kinds of trees. According to these returns, 46,175 acres of the total area (309,741 statute acres) under Woods and Plantations were under Larch, 35,020 under Fir, 15,291 under Spruce, 3,377 under Pine, 25,158 under Oak, 7,398 under Ash, 9,826 under Beech, 2,562 under Sycamore, 2,750 under Elm, 4,002 under Other Trees, and 158,182 were returned as under Mixed Trees. The area under Woods and Plantations in Leinster was 95,447 acres; in Munster, 105,411 acres; in Ulster, 57,080 acres; and in Connaught, 51,803 acres.

**Bee-keeping.**

The inquiries made in the preceding fifteen years relative to the extent to which bee-keeping is followed in Ireland were repeated in 1901, and according to the returns received, there would appear to have been a decrease of 16·4 per cent. in the quantity of honey produced in 1900 as compared with the preceding year, the returns for which showed an increase of 41·7 per cent. as compared with the quantity in 1898. The quantity of honey produced, according to the returns, was 623,559 lbs.; of this, 143,368 lbs. were produced in the province of Leinster; 211,821 lbs. in Munster; 155,962 lbs. in Ulster; and 112,408 lbs. in Connaught. Of the 623,559 lbs., 403,207 lbs. were produced "in Hives having Movable Combs," and 220,352 lbs. "in other Hives." It was stated that 260,074 lbs. was "Run Honey," and 363,485 lbs. "Section Honey." The number of stocks brought through the winter of 1900–1901 amounted to 33,171; of which 16,754 were in hives having movable combs, and 16,417 in other hives. According to the returns collected, there were 6,743 lbs. of wax manufactured in 1900, of which 3,394 were from hives having movable combs, and 3,349 lbs. from other hives. The returns received in 1900 gave the number of swarms at work during the season of 1899 as 23,981; the quantity of honey as 745,692 lbs.: the number of stocks brought through the winter of 1899–1900 as 31,045; and the quantity of wax manufactured in 1899 as 4,873 lbs.

(a) There is very little employment given through the winter months in this district, and the labourers are not actively employed till end of February.

(b) Labourers who are employed all the year round get 1s. 6d. per day without support. Labourers employed by the day get 2s. 6d. during the busy months in summer. Women and girls are seldom employed except at harvest times and when there is a pressure of work.

(c) The general wages for men is 10s. per week, but at busy times, such as harvest, extra men are employed at the wages stated per day. There is little employment for women as agricultural labourers here, but they are employed at busy times at the wages stated per day.

(*a*) In some instances labourers are given a house and plot of ground and free grazing for a few sheep, &c., and in such cases the average wages would not be equal to that shown here. Boys, women, and girls receive diet in addition in most cases.

(*b*) There are very few men or boys, women or girls employed in this district, except in the harvest season. They generally engage for the year, the men receiving from £14 to £18, and the women from £10 to £14. Young girls seek employment in adjoining counties, and in a great many cases go to London.

(*c*) This is without diet; where diet is given the wages are reduced proportionately. All wages are slightly increased for a few weeks during the harvest. Men taken on for temporary employment receive from 4*s.* 6*d.* to 5*s.* per diem, and women, boys, and girls in like proportion. Women, 2*s.* 6*d.* to 3*s.*; boys, 2*s.* to 2*s.* 6*d.*; girls, 1*s.* 6*d.* to 2*s.*

(*d*) The rate of wages in this district is high in consequence of the number of hands employed on the adjacent Bear Island fortifications.

(*e*) Few women and girls employed except in harvest.

(*f*) Men and boys, without food. Women and girls, none employed.
